<b>Office Action Summary</b>	<b>Application No.</b> 10/692,965	<b>Applicant(s)</b> O'MAHONY, BARRY A.	
	<b>Examiner</b> THUAN T. NGUYEN	<b>Art Unit</b> 2618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8 and 16-21, drawn to a method of determining whether a device emits EMI in one or more regions, classified in class 455, subclass 41.1.
  - II. Claims 9-12 and 22-26, drawn to a method of determining whether a device emits EMI within current location vs the previous location, classified in class 455, subclass 456.1.
  - III. Claims 13-15 and 27-30, drawn to determining status conditions of a device emits EMI based on its unacceptable levels, classified in class 455, subclass 513 (based on ranking on signal strengths).
2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a method of determining whether a device emits EMI in one or more regions does not require the determination on location and/or signal strengths. The subcombination has separate utility such as Group II and III clearly suggests a different embodiment of a method of determining whether a device emits EMI within current location vs the previous location and the (distinct) determination on status conditions of a device emits EMI based on its unacceptable levels.

Art Unit: 2618

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
